

Protecting Our Community From Climate Change Impacts: Help Shape Pacifica’s Resilience Plan for the Coastal Zone— Community Forum May 2

Join us Saturday, May 2 | 10 AM – 1 PM | Pacifica Community Center

Be part of a community process to shape a Climate Resiliency Plan that protects our neighborhoods and prepares our city for the challenges ahead. Your voice and input are essential. Registration is required.

Pacifica’s coastline, homes, and infrastructure are faced with increasing risks from sea level rise, erosion, storms, and extreme rainfall. On May 2nd, 2026 the Pacifica Land Trust (PLT) invites you to take part in a community-driven forum to help build a climate resiliency plan for our community through nature-based solutions such as wetlands, dunes, and reefs.

Thanks to a grant awarded by the California State Coastal Conservancy, the PLT is conducting a *Pacifica Coastal Resilience Opportunity Study*. This effort will analyze local conditions, identify areas most vulnerable to climate-related hazards in Pacifica’s Coastal Zone, and develop practical concepts for nature-based solutions. The final study will provide a roadmap to reduced risk, improved long-term resilience, and possible next steps toward implementation.

A brief presentation by PLT highlighting the resiliency-building benefits of nature-based solutions will be followed by a community conversation about the preliminary list of priority sites and draft nature-based solutions concepts developed by PLT.

At the May 2 forum, you will:

- Learn how nature-based solutions can build local climate change resiliency
- Review preliminary priority locations across Pacifica
- Share your perspectives and local knowledge
- Help refine potential project concepts

Your participation will directly inform which solutions move forward and how they are designed.

If you’re unable to attend, additional opportunities to provide input will be announced soon.
