

# VIBRATORY FINISHING

## BRIGHTENERS/CLEANERS

### **Metal Medic 7007**

A mild acid cleaning and brightening compound for use in vibratory and other mass finishing machines. At concentrations of 0.5 to 1.5%, this economical product will remove heat treat scale and quench oils. It is very effective on oily parts and does not contain glycol ethers. It is designed for use on steel only.

### **Metal Medic 9009**

A mild, acid cleaning and brightening compound for use in vibratory and other mass finishing machines. At concentrations of 0.5 to 1.5%, this economical product will remove heat treat scale and quench oils. It is very effective on oily parts and does not contain glycol ethers. It is designed for use on steel only.

### **Metal Medic 7010**

A mild, acid cleaning and brightening compound for use in vibratory and other mass finishing machines. At concentrations of 0.5 to 1.5%, this economical product will remove heat treat scale and quench oils. Metal Medic 7010 produces a matte finish for better subsequent Burnish or Polish. It is designed for use on steel parts only and does not contain glycol ethers.

## BURNISHING COMPOUNDS

### **Metal Medic 7915**

An all-purpose product for steel parts. It combines heavy-duty cleaning with rust protection and beautiful finish. It is used with abrasive media for matte finish or non-abrasive media for bright finishes. It does not interfere with the action of the media. This is the ideal product for your automated flow through machines

### **Metal Medic 7977**

An all-purpose product for steel part that combines medium foam cleaning with rust protection and a beautiful finish. It is used with abrasive media for matte finish or non-abrasive media for bright finishes. It does not interfere with the action of the media. This is the ideal product for waste treatment processes.

### **Metal Medic 7390**

Is a good cleaner for buffing components in immersion operations. It is safe on most alloys, provides rust protection on ferrous metals, and is excellent on brass and copper. Low pH makes this product desirable for disposal. Metal Medic 7390 is excellent for part on part and media finishing equipment (vibratory, high-energy, or barrels).
