The National Association of Realtors (NAR) is warning its member agents to be on the lookout for a suspicious email [phishing](#) scam.

The email in question is coming from an address that ends in “elon.edu” and is reportedly riddled with typos and strange capitalizations, [according to NAR’s Realtor Magazine](#). It does not contain the association’s logo and is missing other identifying features.

“In order to create a unified Realtor and affiliate list, we have come up with a database of active Realtors in conjunction with local Real Estate associations,” the email reads. “This is to help Realtors, Lenders, Title agents and Lenders have statewide access to each other, to assist new Realtors for mentorship purposes and education while also maintaining professional ethics and standards. In Lieu of this, please look through attached Member Directory PDF list and ensure your contact information and active Mobile Number is correctly represented.”
