

Monthly Indicators

December 2017

New Listings were down 4.1 percent for the Single Family-Duplex category but increased 14.1 percent for the Townhouse-Condo category. Pending Sales increased 26.7 percent for Single Family-Duplex but decreased 28.9 percent for Townhouse-Condo.

The Median Sales Price was down 23.0 percent to \$692,450 for the Single Family-Duplex category but increased 12.2 percent to \$617,000 for the Townhouse-Condo category. Days on Market decreased 26.7 percent for Single Family-Duplex and was down 22.8 percent for Townhouse-Condo.

Unemployment rates have remained low throughout 2017, and wages have shown improvement, though not always to levels that match home price increases. Yet housing demand remained incredibly strong in 2017, even in the face of higher mortgage rates that are likely to increase further in 2018. Home building and selling professionals are both cautiously optimistic for the year ahead. Housing and economic indicators give reason for this optimism, with or without new federal tax legislation.

There are no year-to-date figures for inventory because it is simply a snapshot frozen in time at the end of each month. It does not add up over a period of months.

Glossary of Terms

| | |
|---------------------------------------|--|
| New Listings | A measure of how much new supply is coming onto the market from sellers. |
| Pending Sales | A count of all the listings that went into Pending during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a "leading indicator" of buyer demand. |
| Closed Sales | A measure of home sales that were closed to completion during the report period. |
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Average Sales Price | A sum of all home sales prices divided by total number of sales. |
| Percent of List Price Received | A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period. |
| Days on Market Until Sale | A measure of how long it takes homes to sell, on average. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county. |
| Inventory of Active Listings | A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale. |
