

Our Quarter in Photos!

Valley Children's Hospital Adaptive Sports Program was presented with a check from Thiesen Dueker for \$10,000 which was raised during our Golf Tournament this summer. Children's Hospital Adaptive Sports Program provides recreational and athletic experiences designed for individuals with physical and health impairments and conditions ranging from cerebral palsy to spinal cord injuries. Our donation will be used toward an adaptive paddle board, oars and life vests for the kids.

The Freewheel Project offers low cost action sport BMX & Skateboarding camps to youth in Fresno County and its surrounding communities. The goal with the Freewheel Project summer camps are to teach youth how to make healthy life choices, donate time to their communities and understand the importance of fiscal responsibility. Thiesen Dueker presented Tony Hoffman, founder of Freewheel Project, with a check for \$5,000, raised by donations from our Bowling for Charity event earlier in the year.

Tailgate season is in full swing! We have teamed up with Precision Civil Engineering and our tailgates have been full of fun, friends and food! And maybe a mechanical bull too!
