Positioned for Near-Term Monetization Opportunities; Pipeline Progressing Well; Maintain Buy-Venture.

QNTM made significant progress in advancing its pipeline of clinical assets during Q4:24. The fourth quarter saw the completion of Phase 1 trials of Lucid-MS and the launch of a new product rekvry™, targeting alcohol misuse treatment. unbuzzd™ launched last year has several near-term monetization opportunities including the upcoming launch in Puerto Rico and the recent partnership with the Asian American Trade Associations Council. **We reiterate our Buy-Venture rating and adjust our target price to \$12.90 per share (earlier \$12.70).**

Company Description

Quantum BioPharma is a clinical-stage biotechnology company with a robust pipeline of innovative treatments focused on addressing significant unmet needs in brain disorders and alcohol health. The Company has two candidates in different stages of development – Lucid-MS and unbuzzd™.

Q4:24 Highlights

- The Company does not report any revenues. QNTM reported G&A expenses of \$1.93 million in Q4:24, an increase of 41% compared to \$1.37 million in Q4:23.
- Net loss increased to \$5.4 million versus a loss of \$1.6 million in Q4:23.
- With the recent fund raise of \$5 million, QNTM noted that it has enough liquidity to meet its investment plans and day-to-day expenditures until Q1:27.
- The Company began the development of a new product, rekvry™ which is aimed at the treatment of alcohol misuse targeting emergency and hospital settings.
- QNTM completed Phase 1 of the multiple ascending doses study of Lucid-21-302 (Lucid-MS) in healthy adults. Lucid-MS was found to be safe and well-tolerated by the safety review committee (SRC). The Phase 2 trial is likely to commence in Q1:26.
- QNTM plans to list Celly Nutrition Corp on a major U.S. exchange via an IPO. The IPO will be a significant milestone for Celly Nutrition and will provide the Company with access to capital to enhance marketing and distribution of unbuzzd™.
- QNTM continues to diversify its treasury holdings towards Bitcoin. It purchased US\$1.5 million worth of BTC in March 2025 bringing the total purchases to date at US\$3.5 million.
- We reiterate our Buy-Venture rating and adjust our price target to \$12.90.

Primary Risks

- The Company has experienced substantial losses since its establishment and might continue to face financial deficits in the foreseeable future.

Please refer to the end of this report to obtain important disclosure information.

Investment Thesis

Quantum BioPharma Ltd. (QNTM) is a clinical-stage biotechnology company dedicated to pioneering treatments for critical gaps in brain disorders and alcohol health. The Company boasts a strong pipeline of innovative therapies. Currently, it has two candidates at varying stages of development – 1) Lucid-MS, a unique proprietary compound designed to address progressive Multiple Sclerosis (MS); and 2), unbuzzd™, an exclusive formulation comprising natural ingredients, vitamins, and minerals. This formulation aids in expediting alcohol metabolism, thus lowering Blood Alcohol Content. Of these, unbuzzd™ was commercially launched in the U.S. in August 2024. unbuzzd™ is spearheaded by marketing luminary Kevin Harrington and former CEO of Celsius Holdings, Inc., Gerry David. Together, they have collectively generated billions of dollars in sales and brand value for shareholders. In addition, advancement in clinical trials of Lucid-MS and launch of a new product, rekvry™, present potential growth opportunities.

We maintain our Buy-Venture rating and adjust our price target to \$12.90 per share.

Q4:24 Results

The Company did not report any revenues. Quantum Biopharma reported G&A expenses of \$1.93 million in Q4:24, an increase of 41% compared to \$1.37 million in Q4:23. The increase is attributable to higher investor relations expenses, partial and foreign exchange losses which are offset by a decrease in professional fees, general office expenditures, and lower consulting fees. However, going forward, we expect general and administrative expenses to increase as QNTM increases its headcount to grow the business. QNTM incurred a 14,386% increase in total R&D expenditure to \$4.28 million in Q4:24 as a result of advancing its key clinical assets.

Net loss increased to \$5.4 million versus a loss of \$1.6 million in Q4:23. Notably, the cash and cash equivalents were \$12.1 million as of December 31, 2024. Post Q4, the Company raised \$5 million in additional proceeds which will be used to advance its clinical assets and for general working capital. Management noted that they have sufficient liquidity to meet its investment plans and day-to-day expenditure until Q1:27.

unbuzzd™ Launched in the U.S.: Quantum noted that it commercially launched unbuzzd™ powder sticks in 2024. They are available as ready-to-mix powder sticks in configurations of 3-packs, 8-packs, and 18-packs. The packs are available in convenience, liquor, and drug stores across the United States as well on amazon.com and unbuzzd.com. The partnership with Asian American Trade Associations Council (AATAC) will accelerate the availability in offline retail stores. AATAC members operate more than half of all convenience stores (such as 7-Eleven, Shell, Circle K) across the U.S. ensuring wide consumer reach for unbuzzd™. With the recent clinical trial confirming the potency of unbuzzd™ to lower blood alcohol concentration within 30 minutes, the single-use stick in a convenient 8-pack box could be a significant growth driver for QNTM. The Company is awaiting approval from Health Canada to begin selling unbuzzd™ in Canada.

Commenced Development of rekvry™: The Company began the development of a new product, rekvry™, which is aimed at the treatment of alcohol misuse. The product is mainly targeted for emergency and hospital settings. The product targets a huge unmet need and has potential for exponential growth.

Completes Phase-1 Multiple Ascending Dose Study for Lucid-MS. Quantum completed the Phase 1 randomised, double blind, placebo-controlled trial aimed at evaluating the safety and pharmacokinetics of multiple ascending doses of Lucid-21-302 (Lucid-MS) in healthy adults. Lucid-MS was found to be safe and well-tolerated by the safety review committee (SRC). QNTM is now focusing on the Phase 2 trial which is likely to commence in Q1:26.

Celly Nutrition IPO to Unlock Value. QNTM announced that it is aiming to list Celly Nutrition Corporation on a major U.S. exchange via an IPO. Celly Nutrition has engaged a leading New York-based investment bank for the listing and is aiming to raise up to US\$10 million in capital. The IPO will be a significant milestone for Celly Nutrition by providing the Company with access to capital to enhance marketing and distribution of unbuzzd™. The IPO will unlock value for QNTM shareholders as Celly Nutrition as a standalone business will receive a higher multiple compared to LUCID-MS (currently in Phase 2 trials).

Valuation

We value each of the Company's lead drug candidates – Lucid-MS and unbuzzd™ to arrive at a final value for QNTM. We value Lucid-MS using a risk-adjusted DCF, while unbuzzd™ is valued using peer comparable methodology.

Lucid-MS: We have estimated revenue for Lucid-MS based on the targeted disease incidence rates and the Company's ability to capture market share. We model the U.S. and the EU market for Multiple Sclerosis (MS), where the Company is currently targeting to advance the drug. For Lucid-MS, we have assumed a probability of success of 10%. Furthermore, we have accounted for the royalty and milestone payments to UHN. We assume a royalty rate of 3%. We assume a 15% market penetration to incorporate Lucid-MS's attractive value proposition, which include its non-immunomodulatory response and superior efficacy given its ability to prevent and reverse myelin degradation. We assume that Quantum BioPharma does not out-license Lucid-MS to other large pharma companies upon the release of positive results from its ongoing clinical trials.

A 30% discount rate is assumed to reflect the heightened risk of a clinical-stage drug development Company. We factor in a nine-year commercial life, with initial sales to commence in 2029, sequentially ramping up towards its full penetration by 2032. We assume continued R&D, sales & marketing, and SG&A expenses throughout the life of the product.

The exhibit below summarizes our risk-adjusted DCF.

unbuzzd™: It is challenging to value unbuzzd™ given the limited number of similar publicly traded companies. In our comparable company analysis, we screened for companies in the alcohol hangover cure sector. We value Unbuzzd™ at 0.8x 2027E sales of \$327 million, at a 50% discount to the peer group owing to its smaller size as well as its early-stage in its business cycle with no revenue. This results in a total valuation of \$130 million for unbuzzd™ (discounted at 30%).

The exhibit below summarizes our peer group multiples.

We add the value of Lucid-MS and 25.71% stake in unbuzzd™ to arrive at the total enterprise value (EV) of Quantum BioPharma. We then add cash and subtract debt to arrive at the implied equity value. Based on this outcome, our fair value estimate for QNTM is \$12.70 per share. Note that the Company will need to raise money over the next few years to fund the development of Lucid-MS. As such, we use 2027 fully diluted shares in our valuation to factor in the impact of fund raise.
