**For Immediate Release**

Sept. 15, 2022

### **The lights are on at the new MoboTrex facility**

PFLUGERVILLE, Texas — MoboTrex, which offers traffic control and mobility solutions, is on the move. The company relocated from its facility in Austin, Texas, to a customized building in nearby Pflugerville. The new facility, which began production this month, has ample space for increased efficiency in production and abundant amenities for the company's 100-plus employees.

"This move represents continued growth and progress for MoboTrex," said Bob Clamp, CEO. "We customized this manufacturing facility to better serve our dealers and customers throughout North America, and we're looking forward to the way in which this enhances the workspace for our employees."

MoboTrex employs residents in the Pflugerville community and nearby areas. With increased parking and enhanced accessibility, the new facility helps employees deliver outstanding work in a comfortable and bright environment.

The move to nearby Pflugerville is another way MoboTrex is dedicated to manufacturing in the United States. The traffic and mobility solutions company is proud to deliver products built by American workers, with multiple product lines now certified to meet the Build America, Buy America Act requirements.

"We're thrilled to now be part of the Pflugerville community," said Tony Hebert, Senior Production Manager. "It's important to us to be good members of the local community, and we're looking forward to enjoying all the benefits this great city has to offer."

The new space also provides abundant opportunities for MoboTrex to innovate and manufacture high-quality and cost-effective traffic control solutions including its flagship brand of Eagle Traffic Control Systems products.
