

Permanent Automatic Protection at SCHOOL CROSSINGS!

EAGLELUX TRAFFIC BEACON and FLASHER with Automatic Time Clock Control

The Eaglelux Traffic Beacon and Flasher has been designed to cover the requirements of each community. More sturdily designed for longer life, with mechanical parts identical to those used in the highest quality traffic signal installations. All parts are standard and readily available.

This unit is completely flexible to fit your application now and in the future. The optical unit of this beacon gives the utmost in efficiency. Dust and water tight, the beacon is the same used in the Eaglelux Traffic Signal, including the same "Anti-Sun Phantom" optical unit.

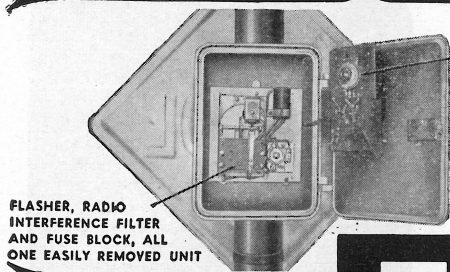

The two beacons operate on 150 watts.

All equipment is guaranteed for a period of one year against defects in materials and workmanship.

This double-unit package includes two beacons with standard pedestals and bases, two diamond-shaped school signs with clamps for mounting, one flasher unit, and time clock with waterproof cast aluminum cabinet. SLIGHT DEVIATIONS FROM THE STANDARD UNITS SHOWN ARE ACCEPTABLE FOR THIS PACKAGE PRICE. See your Eagle Signal representative or write Eagle Signal Corp., Moline, Ill. and ask for Bulletin B10-A.
