

# ACT NOW!

Grant Applications due July 12. It's not too early to start on your 2022 application!

## Looking for a solution to snow covered traffic signals?

### Check out the Eagle Heated Signal Visor

Named the “2021 Coolest Thing Made in Illinois,” an ultra-efficient, positive temperature coefficient heating element keeps the visor warm in snow conditions, eliminating the chance for snow to build up on the LED.

### SIGNAL VISORS NOT IN YOUR BUDGET?

The Department of Transportation's **National Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Grant Program** can help. This \$1 billion program – formerly TIGER and BUILD Transportation Grants – funds surface transportation infrastructure projects that will have a significant local or regional impact on the more efficient movement of people and goods. Successful projects will create good-paying jobs, improve safety, apply transformative technology, and explicitly address climate change and advance racial equity.

Award amounts available from \$5 million to \$25 million (\$1 million for rural areas) and require a 20% non-federal match.

### ABOUT MOBOTREX

MoboTrex's expertise results in the best traffic solution for every customer, every day. From traffic signals to pedestrian signals and traffic control cabinets to intersection control software, MoboTrex keeps a mobile population moving forward with innovative products and expert solutions, one intersection at a time.
