

We need your input to plan playspace improvements!

- The existing playground is 23 years old and many of its parts are reaching the end of their useful life.
- Demand for playground equipment is higher than the amount available during busy recess periods.
- 85% of the usable outdoor space is blacktop – the highest fraction of all District 102 schools.

What would you like to improve?
New equipment? More equipment?
Less blacktop? More space for play?

Sketch out some ideas for how you would like to see our space used!
