

Andrew Brousseau
Black Earth Compost

CARBON SEQUESTRATION

BLACK EARTH COMPOST

SUN. OCT 6 2024

3:00 PM

**Annisquam Village Church
820 Washington St.
Gloucester**

Join Us as Andrew Brousseau, co-founder of Black Earth Compost, explains how compost helps sequester CO₂ (carbon) from the atmosphere by nourishing your soil and plants, which fixes CO₂ into stable forms stored in the soil long term. He will also discuss a plan for carbon sinks and food security in Massachusetts by choosing compost.

You Can Reduce Greenhouse Gas!

Brought to you by **the Interfaith Committee of the Cape Ann Climate Coalition**
