

BIO

Deven Judd

Deven Judd gravitated towards airport management because it combined business, aviation, operations and so many other aspects of other industries. Deven began his career in 1998 with the goal of becoming an airport executive director. He has spent his career in commercial management of airports serving in properties, business development, planning, real estate, parking, rental cars and concessions. He is currently the Director of Concessions & Customer Development at Metropolitan Washington Airports Authority which operates both Ronald Reagan Washington National Airport and Washington Dulles International Airport. With one of the best concession programs in the country, generating more than \$300 Million in revenue, the Authority offers a favorable climate for a variety of business enterprises at both Airports.

Mr. Judd has held positions with Hartsfield-Jackson Atlanta International as a Concessions Development Manager, Jacobsen/Daniels Associates as a Project Consultant and the Jacksonville Aviation Authority, as a Business Development/Properties Administrator.

Mr. Judd is both an Accredited Airport Executive (A.A.E.) bestowed by the American Association of Airport Executives and an International Airport Professional (IAP) which is awarded through the Global ACI-ICAO Airport Management Professional Accreditation Program, a strategic initiative born from the partnership between Airports Council International and the International Civil Aviation Organization. Additionally, he holds the Project Management Professional (PMP) certification, which is the most important industry-recognized certification for project managers. You can find PMPs leading projects in nearly every country and, unlike other certifications that focus on a particular geography or domain, the PMP is truly global, allowing an individual to work in virtually any industry, with any methodology and in any location. In 2014, Airport Business Magazine named Deven to its list of 40 industry leaders to watch under the age of 40.

Deven majored in Aviation Management at Hampton University and earned an MBA from the University of North Florida. Deven is also graduate of the Airport Executive Leadership Program presented by Airports Council International and the Concordia University - John Molson School of Business.

Deven and his wife, Joy have been married for 16 years and have three children.
