

MANAGE WATER WITHOUT SOAKING YOUR BUDGET

Affordable WATER MANAGEMENT SOLUTIONS AQUA-CA FROM SOLU-CAL

Innovative soil infiltration and hydration surfactants work together to create a balanced, uniform wetting front while Infiltration surfactants enhance flow past barriers like thatch and organic matter, then hydration surfactants hold the water in the soil over time for increased volume. This helps better manage water whether from irrigation, weather, or a combination of both. Don't wait for Mother Nature - protect turf from harsh drought conditions with Aqua-Ca from Solu-Cal.

BUILT WITH HORIZONTAL SURFACTANT + VERTICAL WATER INFILTRATION plus CALCIUM + PROBIOTICS

Aqua-Ca works well even with deluge conditions, reducing standing water at the surface. Be ready for any irrigation challenge with Aqua-Ca products by Solu-Cal. Options for any budget. Water Management that's Affordable. Effective. Powerful.

*Improve water penetration, distribution, and retention in the soil:
Aqua-Ca Technology for Better Water Use*

- 6 weeks of improved water management and water use efficiency
- 50lb bag supplies 26 oz per acre of **Aqua-Ca** with 11m coverage
- More efficient use of irrigation water & rain water
- Increases soil moisture movement and retention in the root zone
- Allows water to flow more readily into the soil reducing standing water & runoff
- Develops uniform and longer lasting color with less Nitrogen leaching
- Makes soil applied products more readily available to the plant for a longer period
- Effective for rapid dry-down - lets sports turf to quickly return to playable condition after heavy rainfall
- Improves soil moisture uniformity to reduce dry spots
- Promotes environmental stewardship & energy savings with reduced irrigation inputs

WATER MANAGEMENT SOLUTIONS FOR EVERY BUDGET

*Improve water penetration, distribution, and
retention in the soil:
Aqua-Ca Technology for Better Water Use*

Aqua-Ca with Humic+PLUS

Multi-functional infiltration & hydration soil surfactant blended with Activated Humic Acid and Probiotics to release nutrient reserves

- 6 weeks of improved water management / water use efficiency
- 50lb bag supplies 26 oz per acre of Aqua-Ca applied at 11m coverage
- Allows more efficient use of irrigation water and rain water

JUST ONE BAG, MAXIMIZING FOUR POWERFUL APPLICATIONS

6-12-6 + Solu-Cal with Aqua-Ca and INTENSIFY Soil Microbial BioCatalyst

A Four-Stage Powerhouse Fueled by Nature

Maximizes available water & nutrients for better turf establishment

- 1) Calcium for nutrient availability
- 2) Starter Fertilizer Nutrients
- 3) Aqua-Ca Water Management Technology
- 4) INTENSIFY Soil Microbial BioCatalyst

**3-0-5 SOP WITH 2% IRON, 5% SOLUBLE CALCIUM
AND INTENSIFY MICROBIAL BIOCATALYST**

STRESS DEFENDER RECOVERY BLEND

*Build hardiness, drought resistance
and stress tolerance with a healthy,
no surge green-up*

- Specialized fertilizer mix of nitrogen and potassium
- Supports healthy plant growth and aids photosynthesis
- Powerful water management tool for both vertical and horizontal hydration
- Iron for healthy green turf plus 5% soluble Ca

**PEAK IRON 4-0-6 + AQUA-CA
4% IRON WITH WOLF TRAX & SOLU-CAL MAG
AND INTENSIFY MICROBIAL BIOCATALYST**

PEAK IRON 4-0-6 + AQUA-CA

*Green Up Anytime with Aqua-Ca
Technology to increase water
penetration and water infiltration*

- More efficient use of irrigation water and rainwater
- Increases soil moisture movement and retention in the root zone
- Increased water penetration & reduced runoff
- Better water distribution through the root zone

*Improve water penetration,
distribution, and retention in the soil
with Aqua-Ca Technology for 6 Weeks
of Better Water Management*
