

Detail Your Ride like a PRO with Just a Bucket of Water & an UltimateCloth!

Whether you drive a car, truck, or motorcycle, you can detail your ride like a pro—with nothing more than an *UltimateCloth* and plain ol' water. No chemicals. No soap. No streaks. Just a clean, shiny ride inside and out. **Here's how:**

What You'll Need:

- 1 clean **UltimateCloth**
- 1 bucket of clean water — **no soap needed!**

HOT TIPS Before You Start:

- **Rinse your cloth often** as you go.
- **Change the water** when it gets too dirty.
- **Fold your cloth into quarters** — makes it easier to wring out and gives you 8 clean surfaces to work with. When one side gets dirty, flip to a fresh one!

Interior First:

1. **Start with the inside windows and mirrors first** so you don't pull something into the cloth from the other surfaces that may leave streaks. (The windshield and inside windows can be a pain but they'll be a breeze with a clean cloth).

HOT TIPS #2:

- Leave the outside of the windows for later as they can be quite dirty and you want to keep your water 'fresh'.

- If you see **water droplets** left behind, your cloth is too wet. Wring it out *well* to avoid water spots. You'll notice the water evaporates quickly when the cloth is just damp.
2. By the way, a *clean cloth* will never scratch a surface so it's safe to use on **motorcycles and boats wind screens** too!
 3. Move on to the **dashboard, instrument panel, chrome or wood trim, leather seats, and door panels.**
 4. You can even lift some light stains from the **headliner or carpets**—just dampen the cloth and gently blot or wipe.

Now, the Exterior:

1. Grab a **fresh bucket of water** and rinse the outside of your vehicle with a hose if it's really dirty—or use your **sopping wet cloth** to loosen up bug guts, bird droppings, and road grime.
2. *Important:* **Let the water do the work**—don't scrub hard. The UltimateCloth won't scratch surfaces, but dirt can.
3. Wipe down the **paint, chrome, and wheels.** Got scuff marks on your motorcycle's chrome exhaust? The cloth can take care of that too.
4. Lastly, finish with the **outside of your windows.** Rinse your cloth well and refresh your water if needed. Even if the cloth doesn't look showroom-ready, it's still cleaning like a champ!

All Done?

Step back and admire your clean ride. You did it! Go ahead—**pat yourself on the back** and take that baby for a spin. 😎
