

Meet us on the **DIC AI CAMPUS BERLIN**

AI Campus Berlin – Where AI Comes to Grow

Ideate, Build, and Scale AI Ventures

Copyright (Photo): Merantix

The AI Campus Berlin is a not-for-profit space where research, startups and corporates come together and collaborate on Artificial Intelligence projects. It's the first of its kind in Europe. The campus has 5'200sqm office and is a community hub in the heart of Berlin. Initiated by The Artificial Intelligence Venture Studio Merantix, the AI Campus has built up a strong partner network of tech giants and hosts tenants ranging from university groups, young startups and large corporates that all want to connect on AI.

Some examples of companies at the AI Campus Berlin are Berlin-born Kausa, a developer of business intelligence tools, and Cambrium, a biotech company working on how new materials can be produced biologically. Instead of doing this in the laboratory, billions of DNA sequences are calculated on the computer.

Become a part of the AI Campus. Further information and news on Berlin's AI ecosystem can be found at ki-berlin.de – an initiative by Berlin Partner for Business + Technology.
