VIDEO CHAT WITH YOUR DOCTOR FROM HOME

WHAT IS TELEMEDICINE

Telemedicine is a way to interact with your doctor with the use of video chat. It is a more convenient way to see your doctor if you're on the go, out of town, or just unable to get to the doctor's office.

Scheduling a telemedicine appointment will allow you to video chat with the doctor at your convenience.

GET REGISTERED AND SCHEDULE YOUR APPOINTMENT

Contact your physician's office to have them register you for the patient portal and telemedicine. You will need to provide an active email address. Once registered, you will receive confirmation emails for both the patient portal and telemedicine. Follow the prompts in the emails to activate your accounts.

*Please note that if you are registering for yourself and someone else (for example, yourself and your child), you will need to provide a unique email for each person being registered.

YOUR TELEMEDICINE APPOINTMENT

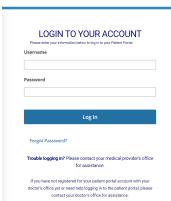

To use telemedicine, you will need access to a computer with an internet connection, a microphone, and a webcam.

- 1. At the time of your appointment, log in to your patient portal through your internet browser.
- 2. Select the green video icon (📑) at the top of your screen. This will launch telemedicine in a new window.
- 3. At your appointment time a green "Start Visit" button will appear. Click "Start Visit" to begin the visit.
- 4. Follow the prompts to complete the intake forms then click "Proceed" to enter the virtual waiting room.
- 5. Once the doctor is ready to see you, your video appointment will begin.
- 6. When the visit has been completed, you will be able to view and download a summary of your visit.
