

What is happening? Sanofi is modernizing by investing in new back-end systems to increase our ability to adapt to a changing market and meeting evolving customer demands.

What does this mean for me in the short term? There will be a “blackout” from May 24th to June 3rd

- It is recommended that you place an order to last you until June 17th to give you additional cushion to help avoid any inventory urgency. It is recommended that you place your order between April 22nd and May 17th.

What does this mean for me in the long term? Sanofi will be better able to meet your evolving needs and will have the systems needed to create more solutions in the future. This is just one part of a larger modernization journey

What else are you working on? Sanofi is making investments across the board to help make us more responsive to evolving customer needs
