| # | RESPONSES | DATE |
|----|--|--------------------|
| 1 | Same day appointment | 6/26/2023 11:01 AM |
| 2 | Depends on situation. If very ill sounding, sent to ER. If mild, come to office for evaluation. | 6/26/2023 5:45 AM |
| 3 | Discuss the level of the fever. Any other associated symptoms. Last vaccines. Potential risk contacts. ER if uncomfortable with any of these responses. Follow up in the AM. | 6/25/2023 6:49 AM |
| 4 | Offer to make an appointment for the infant to see the physician. | 6/23/2023 4:47 PM |
| 5 | If fever exceeds 100, we bring them in for a sick visit. | 6/23/2023 2:43 PM |
| 6 | If they have a fever of 100.4 or higher, we send to CHOA UC/ER | 6/23/2023 1:55 PM |
| 7 | We bring them into the office for assessment. | 6/23/2023 1:49 PM |
| 8 | Rectal temp of 100.4, we send to the hospital. If parent unsure of fever temp or less than 100.4, we will see patient in the office. | 6/23/2023 1:37 PM |
| 9 | Protocol: What is the temperature reading? What time was it last checked | 6/23/2023 12:39 PM |
| 10 | The patient must be triaged by a provider to determine if they need to go to the ER or come into the office. | 6/23/2023 12:25 PM |
| 11 | Confirm fever send to ER do not have availability for cbc in office | 6/23/2023 12:09 PM |
| 12 | If there is a rectal fever over 100.4 and they are under 8 weeks of age, we will send them to the ER . We usually will consult with the Dr. first | 6/23/2023 11:41 AM |
| 13 | They have to be seen | 6/23/2023 11:30 AM |
| 14 | They are directed to go to CHOA ED asap | 6/23/2023 11:23 AM |
| 15 | Infants with a temperature of 100.4 or higher are instructed to go to CHOA ED. | 6/23/2023 11:23 AM |
| 16 | we make them an appointment that day | 6/23/2023 10:40 AM |
| 17 | any infant 6 mos or younger with fever of 100.4 or greater will be seen in office or sent to ER, depending on time of day. Below 100.4 will be assessed by triage nurse for symptoms, etc to determine whether needs to be seen or monitored at home | 6/23/2023 10:28 AM |
| 18 | RN OR LPN will triage to see how they took the temperature, etc. If there is a fever greater than 100.5 rectal we send them to the ER. If the parent cannot check a rectal temp we see them in office, triage, and send as needed. | 6/23/2023 10:25 AM |
