

You Are “Our” Sunshine

Chorus

Am C Am C
You are our Sunshine, our only Sunshine
F C Am
Greenhouse gases must go away
C F C
We hear your warning, about global warming
Am C G G7 C
Tomorrow will be a brighter day

Verse

We can no longer just stand by, as glaciers melt and species die
Land disappears, millions in tears, it is time to clean up our skies
Together put on the breaks, turn around before it is too late
No more than two-Celsius degrees, we can do this, if we all believe

Fires, Floods, Droughts, Hurricanes, energy policies that are insane
We must save our earth in time, not protect the corporate bottom line
All that methane and CO2, can be controlled, it's up to me & you
Raise our voices we're not alone, this blue sphere is our only home

A cleaner world within our grasp, make hydrocarbons a thing of the past
Solar, Wind and Hydro too, Is our future, it's up to me and you
An agreement over in France, gives us hope, the world a chance
But we all must get on board, fully implement the Paris Accords

What will our children's children say, if we do nothing but turn away
For them and us the future calls, to save our planet for both one and all
Youth of the world understand, we hold their future in our hands
Now is the time, now is the hour, for together we all have the power
So stand up, take control, it's our world, only one we know
Stand together, hand in hand, we can do this, Oh Yes We Can
