

Lunch & Learn Lecture

Advances in Urologic Care and Treatment for Men

Bladder incontinence means a problem holding in urine and is a condition that can be stressful to deal with. However, don't feel embarrassed about talking to your healthcare provider. They are used to dealing with these issues, and can help you manage them.

Dr. Dominic Favale, Urologist, NewYork-Presbyterian Medical Group Hudson Valley, will discuss what causes bladder-related health concerns, common symptoms, as well as treatment options to ease discomfort.

A complimentary light lunch will be served.

Dominic Favale, MD

Urologist
