

## Corporate #MemberMoment

The Canadian Association of Petroleum Producers (CAPP) is the voice of Canada's upstream oil and natural gas industry. CAPP's advocacy program – Canada's Energy Citizens-is one of the largest grassroots, pro energy groups in Canada. We equip Canadians with the tools, and information, as so they can take action and advocate on behalf of one of Canada's most important job creators. We believe this is necessary, as Canadians have been exposed to unbalanced and often erroneous information, that has portrayed Canada's Energy sector negatively, and unfairly. We believe we should be proud of our environmental, social, and innovation record, and it should be celebrated.

More information on Canada's Energy Citizens is available at [www.energycitizens.ca](http://www.energycitizens.ca)
