

JACQUIE MEDEIROS BIO

Since receiving a Bachelors of Science in Interior Design at Florida State University, Ms. Medeiros, after working several years in the field, decided to return to her love of art. Mostly a self-taught artist, she had her early beginnings in the mural and faux finishing fields in Winter Park, Florida before relocating her business to the Palm Beach area in 2006. After a successful ten years in the decorative painting industry, Jacquie decided to transition into the fine art world. Today she is sought after for her people and pet portraits which capture the depth and character of her subjects. A representational painter, she works in both acrylic and oil and strives to bring her subjects alive through the use of loose brush strokes and rich colors.

She has been a member of the Delray Art League since 2014 and is a current member of the Portrait Society of America. Join her at the March demo as she shares some tricks of the trade that will help any painter improve and simplify the process of laying out a painting.
