

Are you getting the absolute best credit card processing rates?

There are multiple hotel Property Management Systems (PMS) and Gateway options available to you as a hotel, which can make it hard to know what solutions are the best to fit your needs!

For example, do you know if your current gateway is passing the data points needed to get you discounted lodging rates, such as check in/check out dates, portfolio number, amount and tax? If you are using a standalone terminal, does it have a hotel program that will pass the data points listed above?

Choosing a credit card processor that is not familiar with the hotel and hospitality industry can raise your hard cost if the transactions are processed as a retail transaction – meaning you could be paying as much as .76% more than you should be. APS Payments is experienced with many hotel gateways and PMS systems. You can leverage our expertise to guide you in the right direction for the gateway which best fits the needs of your business and will pass the datapoints for hotel rates. For smaller businesses that do not have a need for a PMS, we offer all-in-one standalone terminals with hotel programs so that you, too, will get the correct rates for this industry.

APS Payments offers flexible and integrated payments solutions for hotels and is the only endorsed Merchant Services Provider for CLIA and ILIA. APS Payments is a merchant services provider and processor trusted by thousands of merchants to process payments quickly and accurately. We work diligently to get you the lowest credit card processing rates, reduce your risk, and provide the best solutions for your business.

APS Payments provides the following benefits for hotel businesses:

- Tokenized credit card data simplifies PCI Compliance
- Daily, automatic batch reporting
- Discounted Lodging Rates
- EMV chip functionality
- Multi-currency capabilities
- Chargeback portal
- No installation, maintenance, or setup fees
- 24/7 live support

**Take the APS Payments Challenge:** Provide us with your 2 most recent merchant statements, and we will provide an audit for free to see how much we can save you!
