

Beacon House/Tongan Community Center “Housewarming”!

As many are aware, we are coming in under the wire for the construction of the Beacon House and Tongan Community Center building, and there are very little additional funds for some assorted needs in both sides of the building. We thought we would have to survive for a while with concrete floors, but a donor has stepped up and will provide luxury vinyl tile (LVT) flooring for the **entire** 3200 ft² building! Praise the Lord!!

The Finance Committee has unanimously approved a virtual “Housewarming” for the Beacon House and Tongan Community Center. This housewarming will take the form of an Amazon “Shower” registry, allowing anyone in the congregation to buy items to support the opening of the BH/TCC with what it needs to thrive. We will have multiple items for purchase. In addition, we will have the availability of contributing donations to this endeavor, in the case items already purchased or items that may take multiple contributions, such as **rain gutters, irrigation, landscaping and a second clothes dryer!** These items will not be on the wish list, but will be prioritized by the Beacon Committee and Tongan Leadership for purchase with the donated funds.

This proposed “Housewarming” event aligns with our shared commitment to being people of grace. This initiative is not just about raising funds but about deepening our community’s engagement in the mission to which God has called us. We anticipate that through this effort, we will generate the necessary resources and foster greater connection and shared purpose among our congregation and beyond.
