

THE VOSH FOCUSED FOUR

FOUR MAJOR HAZARDS. A SAFER VERMONT.

FALLS

**STAY GROUNDED.
STAY SAFE.**

Falls are a leading cause of serious injuries and fatalities in construction.

- ✓ Use fall protection at 6 feet or more (or lower if required).
- ✓ Inspect and use equipment properly.
- ✓ Train workers on fall hazards and rescue plans.

CAUGHT-IN OR -BETWEEN

**STAY ALERT.
STAY CLEAR.**

Workers can be seriously injured or killed when caught in or between equipment, objects, or collapsing materials.

- ✓ Keep a safe distance from moving equipment and pinch points.
- ✓ Use protective systems in excavations.
- ✓ Plan work and communicate clearly on site.

STRUCK-BY

**BE AWARE.
PROTECT EACH OTHER.**

Workers can be struck by moving equipment, falling objects, or other hazards on the jobsite.

- ✓ Stay out of the line of fire.
- ✓ Use barricades, exclusion zones, and proper signage.
- ✓ Wear the right PPE (hard hats, high-vis, etc.).

ELECTROCUTION

**RESPECT THE POWER.
KEEP YOUR DISTANCE.**

Contact with electrical energy can cause serious injuries or death.

- ✓ Identify and avoid electrical hazards (overhead and underground).
- ✓ Maintain required clearances.
- ✓ Use qualified workers and proper equipment.
- ✓ Follow lockout/tagout procedures.

WORK SAFE. BUILD VERMONT.

TRAIN
Build knowledge.

PLAN
Control hazards.

PROTECT
Look out for each other.

GO HOME SAFE
Every worker. Every day.
