Mad Lab Summer Camps

Mad Science will be taking EVERY precaution available to keep your kids safe in our summer camps

- ✓ Under 10 kids per camp (less than 30% of our room capacity)
- ✓ 6 foot distance between students work stations
- ✓ Masks required, Instructor will wear mask & gloves
- ✓ Daily Temperature checks using a touch-less thermometer
- ✓ Hand washing breaks
- ✓ Sanitizer available at all times
- ✓ Private bathrooms cleaned several times as day along with table top surfaces
- ✓ A fun and educational science experience that your students will remember for years to come!
- ✓ Full & Half Day Camps: 9:00am – 12:00pm, 9:00am – 4:00pm (Full day campers should come with lunch, food will not be provided)

Summer 2020

For a complete list of camp descriptions & availability please visit northeastnj.madscience.org. The below are just a few examples of Mad Lab Summer camps for 2020.

7/13–7/17

NASA Journey into Outer Space

Set your future space explorers on a trajectory from our Earth's atmosphere to the outer reaches of our solar system! This hands-on program brings them closer to the stars, planets, comets, and more. They learn about living in space, getting away from gravity, looking for space phenomena, and they participate in a rocket launch!

6/22–6/26 & 8/10–8/14

BRIXOLOGY

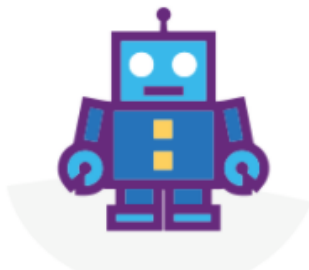

Using LEGO® bricks, kids build a different engineering-themed project in each class. They explore different engineering fields, including mechanical, structural, aerospace, nautical, and bioengineering. They use critical thinking, and creative problem-solving to test and improve their creations.

8/3–8/7

Underground Explorers

Kids learn about archaeology and the techniques scientists use to excavate long lost cities! They discover ancient civilizations and the tools and artifacts they used in everyday life! They also study bone fragments, pottery shards, amber deposits, and fossils. Each class also includes a make and take-home project, like a fossil reproduction, an amber time capsule, and coins from around the world!

7/6–7/10 & 8/24–8/28

Red Hot Robots

Children learn about the uses of robots in our world and spend time experimenting with super cool red-hot robots. They discover the science of circuits and how robots use sensors to explore things around them. They build their very own working robot to take home with them!

8/3–8/7

Secret Agent Lab

This program features fun-filled, hands-on, secret agent-themed science activities that allow kids to play detective, explore forensic science, sharpen their surveillance skills, and crack encrypted messages. Kids become super sleuths!

7/27 – 7/31

Eureka!

Children overcome a series of challenges using basic materials, simple machines, tips from famous inventors, and most importantly, their minds. With a bit of ingenuity, they create catapults and forts, construct working light sticks, and assemble a set of circuits with batteries and light bulbs.

Virtual Summer Camps

Same great camp themes from the comfort of your own home! Mad Science will drop off all camp materials to your home and provide your child with an engaging educational virtual camp experience. All of our virtual camps are live with a Mad Scientist and other campers! Use this summer to get ahead of your science!
