

Dear Team Daikin,

Given the recent worldwide Covid-19 restricted human interaction efforts, we recognize that this is an opportune time for the Daikin Training Team to help you become more knowledgeable about our products.

You will find a list of webinar links below for several different courses. Each of the courses is a total of 8 hours broken up into four, 2-hour sessions. Therefore, each day will include one, 2-hour session. Students must complete all 4 sessions, for each course, to get credit for the course.

The VRV Commissioning course will be 16-hour class, done in 4, 4-hour blocks.

There will be 3 new courses available this week.

Chris Soh from the applications group will be doing 2 separate 1-hour classes.

Outside Air Integration	1hr	Outlining the various methods of ventilation integration with VRV systems
-------------------------	-----	---

EEV Kit for VRV	1hr	Learn how to select and apply EEV kits for AHU integration to VRV systems
-----------------	-----	---

These 2 courses will repeat Tuesday thru Friday

Ductless Service and Troubleshooting will be added this session. The student must attend Ductless Installation and Commissioning before attending this course. There is a lot of information from the I and C that is needed in the S and T, not fair to students that have attended I and C and would have to be delayed covering material already discussed.

There will be a VRV Installation course held at night on this schedule 6 to 8 PM Central time.

If this works out well then, we will do another module from the S and T class. As you can see once they complete all the modules then they will be halfway thru the class, only part left after that would be the hands-on section. Once We establish Our return to the training centers, there time there would be cut in half.

Courses below will begin on Tuesday, June 2nd and repeat the following week. All times are CST. We plan to repeat these courses each week as needed, until we can continue our normal working conditions.

So, just to re-iterate, each person who wishes to obtain credit, for any of the 4 courses below, **must attend all sessions** (for that course) to get credit for the course. Once course is completed the training material in PDF format can be sent to the attendees, contact training@daikincomfort.com. If a student misses more than 30 minutes during the 4-day training (Only applies to courses 8 hours or longer in length) they will not get credit for the course and will need to attend the time frame that was missed.

Example: If a person wants to take the “Ductless Installation and Commissioning” course, and the person wants credit for the course, that person must attend all four 2-hour sessions of the course. Each session will include different material each day, making it very important to attend all 4 sessions to complete the course and obtain credit.

Online Webinar Training Courses

Fit Install & Commissioning - Chris Lee/Ricardo Berrios 8am-9:45am CST

- Day 1 – <https://attendee.gotowebinar.com/rt/6755164552831943437>
