

Dr. Joseph Davi DC, DACBSP

Dr. Joseph Davi is a Sport Chiropractor certified as a Diplomate with the ACBSP. He knows there is no single approach that works for everyone, so he continues to educate himself on emerging therapies and Sport Chiropractic trends to provide the most comprehensive treatment that works for each of his patient's needs. He has experience in MRT Therapy, IASTM Therapy and many others.

He received his education at San Francisco State with a Bachelor of Science in Kinesiology Exercise Science and a Doctorate Degree in Chiropractic. He is an avid researcher, and his work has been in Seminars around the Bay Area.

He played High School and Collegiate Baseball for Monterey Peninsula College and San Francisco State. At 12 years old, he was apart of the first travel baseball team from the Monterey Bay to attend the Cooperstown Boy Baseball tournament, a tournament known at the time for invitation only.

Dr. Joseph Davi provides care for Collegiate and top CrossFit Games athletes. Using his combined continued education with ACBSP and hours spent coaching high school baseball, Dr. Joseph Davi continues to challenge the pattern of athletic injuries. One being the lack of Biomechanical Mobility and Injury Prevention programs for young upcoming athletes.

Therefore, Dr. Joseph Davi started the first Injury Prevention program for both Palma High School in Salinas, Ca and the Monterey Peninsula College Baseball program. The Injury Prevention program consisted of Mobility, Biomechanical Assessments, and Rehabilitation Exercises. With the completion of his first program, the MPC baseball season had ended and the coaches reported no shoulder injuries for all Pitchers. A success they needed due to the many injuries their pitchers have had in the past.

Dr. Joseph Davi is currently in private practice in Salinas, CA where he lives with his wife.
