**LFT Fiber Initiates New Advancements for the Acadiana Community**

**Lafayette, LA** - LFT Fiber is excited to announce significant ongoing upgrades to its network across Acadiana, designed to elevate the internet experience for residents and businesses by implementing cutting-edge Fiber to the Home technologies.

As part of the upgrade, LFT Fiber is reinvesting in its network and deploying the very latest in Fiber to the Home technologies.

"These upgrades provide us an increase in capacity on our network all the way down to the end user," said Eric Grimm, LFT Fiber Chief Engineer. "Once complete, we will be capable of delivering multi-gig symmetric service to every residential user up to 25G symmetrical service on our network while future proofing the network even further by investing in the capabilities to provide more capacity as demanded by our customers."

The estimated scheduled enhancements will take place through Friday, September 19th.

Residents and businesses located near the areas of maintenance may experience brief interruptions of LFT Fiber service during the midnight to 5:30 am window.

LFT Fiber is dedicated to delivering exceptional services by implementing these advancements to the Acadiana community.

###

**About LFT Fiber:**

LFT Fiber operates one of the nation's largest municipal fiber-to-the-home networks, providing internet, video & phone services. As Louisiana's only publicly owned service provider, LFT Fiber is dedicated to creating tomorrow's essential broadband infrastructure while advancing today's internet & telecommunications services.
