Re: Global Supply Chain Concerns

Dear Valued Partner,

I wanted to provide you with an update on our work to address material shortages caused by global supply chain disruptions.

We have resolved supply chain issues for several key items such as fuse cabinets and cable. Unfortunately, we continue to have challenges procuring service transformers and certain pole line hardware.

While it is our goal to complete your new construction project on schedule, we are anticipating these shortages will affect some projects for the next several months.

We continue to make every effort to source materials and to minimize the impact of supply chain disruptions. The actions we started earlier this year have been successful, including establishing contracts with new suppliers, recycling and reusing materials within our business, and leveraging the purchasing power of our parent company, Berkshire Hathaway Energy.

We understand this is inconvenient and will continue to work to meet your needs. NV Energy takes pride in powering our Nevada communities and appreciates the opportunity to serve you. Please do not hesitate to reach out to me if you have any questions at 775-834-4443.

Sincerely,

Eric Schwarzrock
Vice President, Customer Solutions and Projects
