Clark County Water Reclamation DISTRICT

April 17, 2023

RE: EXCEPTION TO CCWRD ADDENDUM #1 TO THE DCSWCS 4TH EDITION FOR THE REQUIRED IMPLEMENTATION OF SD-3

To Whom it May Concern:

Effective May 15, 2023, the Clark County Water Reclamation District (CCWRD) Development Services will require the use of Standard Drawing-3 (SD) *STANDARD MANHOLE COVER AND RING* in certain circumstances. This is contrary to the current Addendum 1 of the Design and Construction Standards for Wastewater Collection Systems (DCSWCS) 4th Edition. This update allows the use of single 24" manhole frame and covers in public right-of-ways less than 60' wide and over sewer pipes less than 12" diameter. The following has been initiated:

1. Projects submitting their Civil Improvement Plans for the first time past the effective date of May 15, 2023 will be required to adhere to the use of the SD-3 if all of the following circumstances are met.
    a. The proposed manhole(s) are to be installed within a public right-of-way less than 60' wide.
    b. The sewer pipe segments into and out of the proposed manhole are less than 12" in diameter.
    c. The depth from the proposed surface and/or manhole rim to top of pipe is less than 20' deep.
2. Projects which have submitted prior to this date may redesign their proposed manhole(s) that meet the above requirements to also utilize SD-3.
3. All other proposed manholes not meeting the requirements listed above must continue to use SD-2 *STANDARD CONCENTRIC DUAL MANHOLE FRAME AND COVER*.

Please feel free to contact Development Services, at (702) 668-8160 or by email: developmentservices@cleanwaterteam.com with any further questions you may have.

Sincerely,

Leslie Long
