

Retha – A Special Girl

By Nancy K. & Chaiti C.

Retha is looking for that special home, one that is just right for her. She's a bundle of joy and a love bug. She is 9 years old and not as active as she used to be – no stairs. She is also a big girl and needs to find a home with experienced GSD owners.

Retha needs someone that has enough space that she can run around in. It does not need to be acreage just a larger yard. Given her age, she needs less activity. Finally, Retha wants her people to be with her and have a larger four door car not an SUV unless there is a ramp.

What will Retha's new family get in return? A loving dog that will want to be with you, want to play with you and also be a couch potato especially when you want to. She would be responsive to the right type of loving training. She loves her humans, other animals not so much.

Retha's foster mom trained her to eliminate

on command in one spot in the backyard.

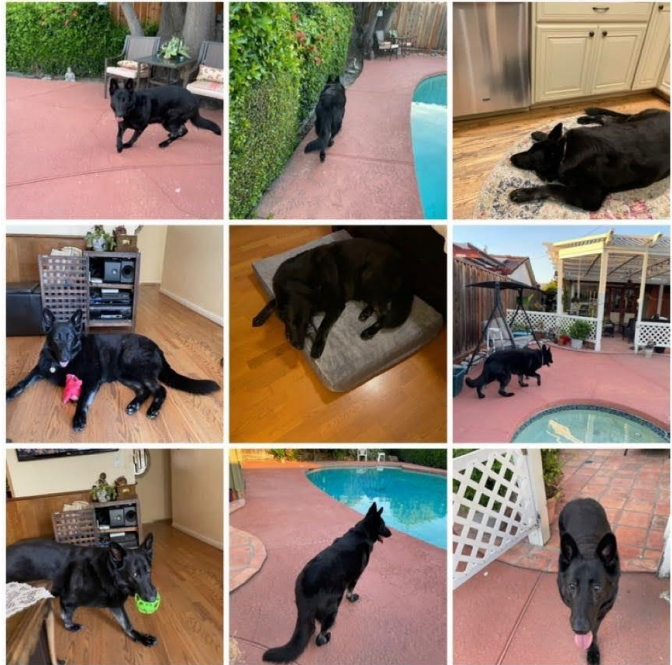

Retha was trained to not go in the garage. She

waits by the back door to go out. Otherwise, she has full run of the house and is very quiet. She does not go up on the furniture.

Retha will give you sweet kisses to wake you up in the morning. She'll serenade you (howl) when she hears sirens and will talk to you while you get her food ready.

As important, Retha loves her toys! She has many all around her foster home. She always picks a special toy for each night. Her crate is her special place. A favorite type of toy is squeaky!

If you think Retha might be a match for your family, please fill out an [Adoption Questionnaire](#) to meet her.
