

The Greatest Gift you can give to a Child...a Second Language!

# In Today's World

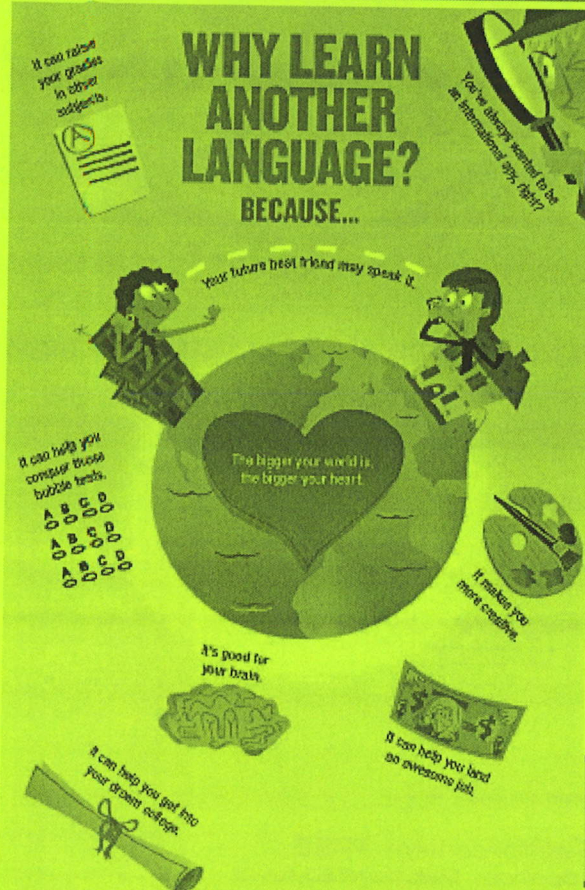

The Importance of Learning a Second Language Increases Daily.  
For the Bilingual Children of Tomorrow, The Opportunities Will Highly Arise.  
Young Children Throughout The World Successfully Learn More Than One Language From Their Earliest Years.

The earlier a child starts learning a second language,  
the better because of their window of opportunity and brain plasticity.

Why?...

## The Bilingual Advantage...

Practice is the Key to Learning a New Language!  
Kids must continue practicing their language skills  
to become fluent!

## Did you Know?

### Early Bilingualism Brings Lifelong Benefits:

Heightened creativity  
Increased self-confidence  
An expanded world view  
Greater intercultural appreciation and sensitivity  
The ability to learn additional languages more easily  
A competitive edge in future markets and the global marketplace  
Flexible thinking and communication skills, helping children consider issues from more than one perspective.  
Enhanced spatial relations

Improved math and problem solving skills  
Higher cognitive performance  
Better problem-solving skills  
Enhanced memory, planning, and multi-tasking skills.  
Enhanced executive function abilities such as working memory, inhibitory control, attention to relevant irrelevant task cues, and mental or cognitive flexibility, as well as improved language skills  
Early Bilingualism may even offer some protection from symptoms of Alzheimer's (impact on cognitive functions as early as seven months of age)
