

Encon Electronics is excited to introduce a

Field-Configurable Sensing Edge

PERFECT
FOR "TRUCK
STOCK"

Cut-to-size in the field.

THE CPT210

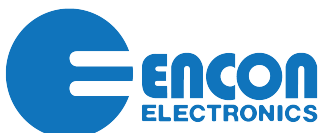

Touch Sensing Signaling

The CPT210 field-configurable sensing edge delivers flexibility and reliability for real-world conditions. It's an ideal product for technicians to keep on their trucks because the extrusion can be cut to the length needed on the job site, keeping your projects on schedule.

The CPT210 features advanced easy-ID, color-coded end plugs and a sealed adhesive-free end design which streamlines installation, resists dust and moisture, and offers multiple monitoring options for seamless operator integration.

Applications

Automated Vehicular Gates
Commercial Motorized Rolling Counter
Shutters and Grilles
Automated Machinery Guarding
Automated Conveyor Systems

KEY FEATURES

Slim, versatile 1" profile for narrow surfaces and pinch points.

Cut to the length you need **IN THE FIELD**.

Easy-ID, color-coded end plugs simplify configuration and field identification.

Sealed, adhesive-free design.

Flexible monitoring options compatible with a wide range of operators.

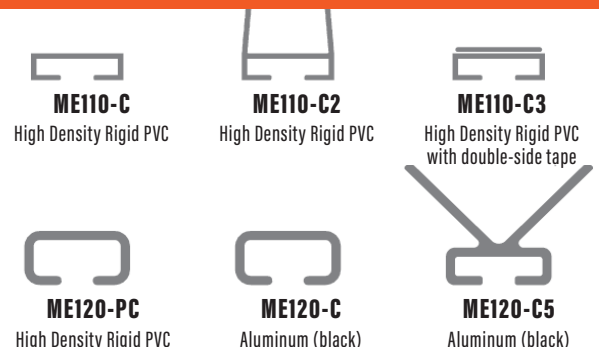

Advanced conductive polymer technology.

Mounts vertically or horizontally.

UL 325 Recognized, CE Certified.

Made in the USA.

OPTIONAL MOUNTING CHANNELS
