

AP European History

AP European History is the class for students who want to learn about the foundations of Western Civilization from 1450.

Starting with the Renaissance, Exploration of the New World, and the Protestant Reformation, AP Euro takes students on a journey to learn the most important artistic, political, social, and economic knowledge about Europe, and we talk deeply about how Europe's interaction with the rest of the world has shaped global society.

This is a class for people who wonder why things are the way they are in the world today. The homework level is light. The best students will read ahead and come to class with opinions and their own side research to jump into hearty discussions. Former students often say, "Man, I wish I could take Euro again."
