

# CAZCA's ArcGIS Hub

**A place for shared  
resources, communication,  
and action within the  
partnership.**

We have identified ArcGIS Hub as a potential tool to help enhance and assist with communication and collaboration among the CAZCA partnership. We are using 2020 to learn and pilot this tool.

Initiative pages are being built, organized by ROSS goals, which will be shared with the alliance. These will feature your ROSS-related work, and assist us all in connecting and collaborating.

For more information about the tool please visit <https://bit.ly/esrihub>. You may also contact Aireona Raschke with questions about the pilot process at [araschke@dbg.org](mailto:araschke@dbg.org).
