Interpreting the ACVIM Consensus Guidelines for Chronic Myxomatous Valvular Degeneration

A two-hour presentation for veterinarians

Presented by Nonya Fiakpui, VMD, MS, DACVIM (Cardiology), Synchrony Veterinary Cardiology

Hearing a heart murmur can be unsettling ... especially when you're not sure what to do next. You're not alone: heart disease affects about 10% of dogs, which chronic myxomatous valvular degeneration (MMVD) being the most common culprit.

This lecture breaks down the 2019 ACVIM consensus guidelines on MMVD into clear, practical steps you can use right away in your clinic. The course focuses on real-world application, equipping you with diagnostic and treatment strategies you can implement in your hospital, turning that moment of uncertainty into a plan of action.
