

MEET AN MSPE MEMBER:

Brandon C. Steacy, PE

NSPE member Brandon C. Steacy, PE is an MSPE Director, currently serving as President Elect until June 2021 when he will become our Society's 68th president.

As a Senior Engineer with LIG Consultants, Mr. Steacy works on many aspects of electrical engineering which include but not limited to electrical system studies, photovoltaic ground mounted interconnections, substation design, and control and protection.

Q: Why did you join MSPE?

A: I joined MSPE because I want to try to strengthen the professional engineering license and create awareness to young engineers that getting their license is an important career decision.

Q: What are your goals as an engineer?

A: My goals as an engineer are to continue gaining knowledge in my field of engineering and to always stay open to learning from others. As I progress in my career, I would like to mentor young engineers and encourage the continuing education of my peers.

Q: Please describe a project that you're involved with.

A: I am currently working on several system studies which include arc flash, short circuit, and coordination evaluations. These studies are in Connecticut and Massachusetts. These studies encompass many facets of electrical engineering from understanding faults to device coordination to make systems reliable and safe. These studies are a very important part of the industry and help to protect personnel working in and around electrical equipment.

Q: How do you spend your free time?

A: I enjoy spending time with my family going to playgrounds and feeding the animals at the local farm. I also play men's league hockey with a great group of guys.

Education and Career Experience:

EDUCATION:

Bachelor of Science in Electrical and Computer Engineering
Worcester Polytechnic Institute

PREVIOUS CAREER EXPERIENCE:

Senior Electrical Engineer, Consulting Engineers Group, Inc.
Field Engineer, Mass. Electric Construction Co.
