

Legislation

CAHIP's legislative engagement was on full display this May during our successful Capitol Summit in Sacramento. Members from across the state gathered in person to connect, learn, and advocate for the issues that matter most to the clients and communities we serve.

We heard from the Executive Director of Covered California on the future of our state exchange and the potential impacts of enhanced Premium Tax Credit expirations and upcoming Medicaid changes. We also welcomed speakers from the Office of Health Care Access and Information (HCAI), who shared insights on their role in health care access, cost oversight, and transparency in California.

As part of the Summit, attendees participated in a CE course that offered a legislative overview — covering civics fundamentals, the legislative process, and CAHIP's current advocacy priorities. Equipped with that knowledge, members met directly with lawmakers at the Capitol to voice support for a bill focused on improving provider directory accuracy, which continues to move through the legislative process. We also raised concerns about SB 242, which would have negatively impacted the Medigap market; that bill was halted shortly after our lobby visits.

We remain actively engaged with state and federal lawmakers, including on the future of enhanced PTCs, and continue to advocate for policy that strengthens access and affordability for California consumers.

CAHIP has joined a coalition of associations with a [letter opposing SB 354](#).
