Nexplanon Clinical Training

Course Director

Sarah Inés Ramírez, MD, Penn State Health Hershey Medical Center

Faculty

Leon McCrea II, MD, MPH, Drexel University College of Medicine

Heather Paladine, MD, MEd, NY Presbyterian-Columbia Family Medicine Residency

Registration deadline: September 9, 2024
NO ONSITE REGISTRATIONS

Course Overview: Nexplanon® (etonogestrel implant) is a birth control implant placed just under the skin of the inner, non-dominant upper arm. Once in place, Nexplanon releases a continuous low dose of hormone to help prevent pregnancy. This 2-hour preconference will consist of a didactic session on the product, along with hands-on training for insertion and removal procedures and implant localization techniques. You must be present for the entire session to be issued a completion certificate. The certificate is required by the FDA to insert or remove Nexplanon.

Course Requirements: Registration is only open to doctors or advanced practice clinicians with furnishing or prescribing privileges in their state. Registration is limited to 36 participants. FMEC will require your National Provider Identifier (NPI) to register.

NOTE: This workshop is offered twice on Thursday, with the same content.
Please register for only 1 Nexplanon workshop.

Learning Objectives:

Upon completion of this session, participants will be able to:

- Identify appropriate patients to receive etonogestrel implant for birth control.
- Prepare patients for placement, and manage technical issues related to placing the contraceptive device.
- Insert and remove the birth control implant in patients.

Registration Fees:

Physicians/Healthcare Professionals: FMEC Member: \$0 | Non-Member: \$50

Resident/Fellow: FMEC Member \$0 | Non-Member: \$25

Students: n/a (students should not attend)
