

Residency-Ready PI Project: Survivorship Care Integration

The FMEC's Supporting Young Breast Cancer Survivors (YBCS), Metastatic Breast Cancer (MBC) Patients, and their Families project, or YBCS project, focuses on improving support services and educational resources for young breast cancer survivors, metastatic breast cancer patients, and their families. This is the next phase of the multiyear project—a fully developed, turnkey PI project supporting YBCS/MBC care and your residency's accreditation needs.

Program Director Value

- ✓ Meets ACGME learning collaborative recommendations
- ✓ Addresses multiple Family Medicine Milestones (2019)
- ✓ Provides structured scholarly activity for residents
- ✓ Includes standardized tools, templates, and reporting forms
- ✓ Short-cycle, feasible, and easy to supervise

Clinician Value

- ✓ FREE CME + ABFM PI credit
- ✓ Practical workflows you can implement immediately
- ✓ Strengthens care coordination and psychosocial support

IDENTIFY

Identify eligible patients and needs

ASSESS

Assess survivorship care needs

COORDINATE

Coordinate care with oncology and community resources

SUPPORT

Provide psychosocial support and education

EVALUATE

Evaluate outcomes and improve care

Scan to express interest (not a commitment).

We'll send details, timelines, and tools.
