

Prepared and Resilient County

Every Wednesday in June and July at 2:30 p.m. Coast Community Branch offers a DVD lecture series by Professor of Biology Greg Pryor on everything from beekeeping to vegetable gardening, including preserving food, making candles, and establishing small vineyards, enabling our community to be more resourceful and resilient.

Saturday, June 10 at 10:00 a.m. the Willits branch library Scientist Don O'Brien will present Extreme Science Magic feats that are fast moving and interactive. All ages can sign up for the Summer Reading Program challenge

June 10, Fort Bragg Branch families and children will be wowed with a STEM Program. X-treme Science Magic has been a popular way to introduce science concepts to young children with funny sounds and "eye-popping experiments!" The library keeps kids learning during summer vacation, preparing them for the school year to come.

June 15, 2:00-4:00 p.m.; the Summer Reading Program Kicks off at the Round Valley Branch of the Library on Thursday. Join library staff and volunteers for popsicles and a sun print art activity. A table will be set up with book recommendations for all ages, reading logs, and a schedule of summer events. The Summer Reading Program supports resilience and community health by offering activities for all ages as well as encouraging reading individually or with a partner, which can help students prepare for the upcoming school year.
