

The Environmental Health team is progressing on strategic initiatives to digitize Land Use, Solid Waste, and Consumer Protection files, which will improve efficiency and service delivery. Digitizing these files will significantly benefit staff, the public, and regulated community by improving efficiency, organization, and accessibility. Staff will save time with quick searches and retrieval capabilities and customers will receive faster responses for record requests.

Land Use Program

Our Land Use Program received 20 septic system site evaluation reports, 6 water well applications, and 25 building permit applications. Inspectors conducted 20 inspections this month consisting of 3 water wells and 16 septic system inspections.

Total Inspections for Consumer Protection

Consumer Protection Program

The Consumer Protection Program is making steady progress as of August 2025. With 67% of the year complete, the program has successfully inspected 45% of the 1,156 regulated facilities at least once. Year-to-date a total of 518 inspections have been conducted, 146 applications processed, and 52 community events applications received. The program has received 48 food-related complaints. This month, 86 inspections were completed: 81 food facilities, 4 public swimming pools and 1 body art facility. In August the team received 32 new food facility applications, 1 application for a body art facility and 9 complaints. Overall, the program has continued to conduct inspections at a steady pace despite being supported by 2 inspectors.

LEA Program:

LEA Program Summary

Total LEA Inspections

Monthly + Quarterly + Annually 2025

Total Inspections Completed 115

Percentage completed this moment in time 88.5%

Percentage of the Year passed 66.7%

Percentage completed towards yearly goal 54.8%

The LEA program completed 115 inspections year-to-date compared to monthly target of 140, with no staffing vacancies affecting output. While slightly below goal, the program's stable staffing levels and consistent inspection activity are maintaining oversight effectiveness. This operational continuity

supports timely regulatory enforcement and ensures that solid waste facilities are monitored to protect public health and environmental safety.

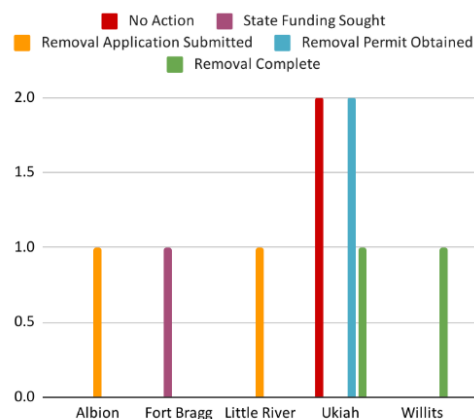

Single-Wall Underground Storage Tank (SWUST) Removal:

Progress on the removal of all Single-Wall Underground Storage Tanks continues, with one facility submitting a removal application and obtaining a removal permit this month, reflecting forward movement in the compliance pipeline. Two facilities, both located in Ukiah, began permitted excavation and removal in August and will likely be captured in the September report. To date 6 of the existing 24 tank removals have been completed. Two of the nine stations have completed both the County and State Waterboard removal requirements. Seven facilities remain, with a total of 18 tank removals required by the December 2025 deadline.

Single Walled Underground Storage Tank Report

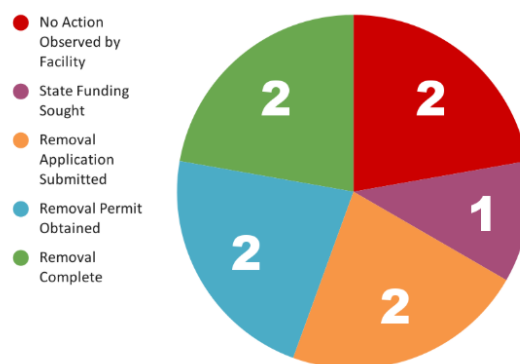

Per CCR Title 23 Chapter 16 §2672 all single-walled petroleum underground storage tanks must be removed on or before Dec 31, 2025
