Dear School Principal or Superintendent:

[State code 20 ILCS 2310/2310-700](#) requires that the Illinois Department of Public Health provide informational materials for school districts regarding influenza and influenza vaccinations and meningococcal disease and meningococcal vaccinations.

Please distribute printed or electronic copies to parents or guardians of the students in your school. Most of the publications below are for students of all ages. The meningococcal information should be provided to parents or guardians of age-appropriate students. The age-based recommendation for meningococcal vaccination is for children 11 years of age or older. I have also included additional information that may be useful to parents.
