

In the U.S. and around the world, people are not getting access to the specialty care they need, when they need it, for complex and treatable conditions.

Moving Knowledge, Not Patients

Through technology-enabled collaborative learning, ECHO creates access to high-quality specialty care in local communities.

Hub and spoke knowledge-sharing networks create a learning loop:

- Community providers learn from specialists.
- Community providers learn from each other.
- Specialists learn from community providers as best practices emerge.

You're invited to join an exciting virtual collaborative learning opportunity!

Health Equity ECHO Initiative Advanced Massachusetts Tuberculosis Infection ECHO

For Beginner AND Experienced Practitioners! Come join us!

Primary care interdisciplinary team members
(providers, nurses, social workers, community health workers, patient navigators, etc.)
