

In Massachusetts and around the world, people are not getting the care they need, when they need it, for complex but treatable conditions.

Moving Knowledge, Not Patients

Through telementoring, ECHO creates access to high-quality specialty care in local communities.

Hub and spoke knowledge-sharing networks create a learning loop:

Community providers learn from specialists.

Community providers learn from each other.

Specialists learn from community providers as best practices emerge.

You're invited to join an exciting virtual collaborative learning opportunity!

Hepatitis C - Project ECHO®

Do you sometimes wish that you could treat your hepatitis C patients in your own practice rather than refer to a specialist? Do you hope to become a local hepatitis C expert in your community? If the answer is yes, Project ECHO® might be for you.

Come join us!

What? Hepatitis C ECHO, a virtual case-based telementoring educational model

Who? Primary care interdisciplinary team members (providers, nurses, social workers, community health workers, patient navigators, etc.)

Why? Tele-mentoring model that links specialists to primary care providers (PCPs) via video conferencing from any computer; Case-based, iterative learning facilitated by specialists and related experts; through guided practice, PCPs become proficient in specialty care.

When? A new cohort begins **February 21st, 2025, 12:30 - 1:30pm ~ with 10 sessions held bi-monthly**

Curriculum content includes:

- HCV screening
- Acute HCV
- Chronic HCV: Workup
- Treatment of non-cirrhotic patients
- Treatment of cirrhotic patients
- Monitoring during treatment
- Monitoring post treatment
- "Topic by request"
- Other hepatitides in the context of HCV/Hepatitis A&B
- Treatment of special populations
