

The Road to Care Mobile Clinic is seeking an experienced, compassionate, and highly autonomous physician, NP, or PA to join our team on a per diem basis, about 2-4 hours per week. We are a small group providing low barrier, high quality, relationship-based, patient-centered care to people in Worcester experiencing homelessness, substance use disorders, serious mental illness, and other complex medical and social needs.

Success in this role requires clinical excellence, flexibility, creativity, and a commitment to delivering patient-centered care in nontraditional settings. The ideal candidate is comfortable practicing independently, making sound clinical decisions in dynamic environments, and collaborating closely with a multidisciplinary team to address the medical, behavioral health, and social needs of vulnerable populations.

Responsibilities:

- Diagnose and manage acute and chronic medical conditions.
- Assess, treat, and support patients with substance use disorders, including medications for opioid use disorder (MOUD).
- Deliver harm reduction-focused care and trauma-informed treatment.
- Perform point-of-care assessments and procedures within the scope of practice.
- Coordinate care across healthcare systems, behavioral health providers, shelters, outreach organizations, and community partners.
- Develop individualized care plans that reflect each patient's goals, priorities, and circumstances.
- Utilize creative and nontraditional approaches to engage patients who face barriers to accessing healthcare.
- Document encounters timely, accurately and maintain compliance with regulatory and organizational requirements.
- Participate in case conferences, team meetings, and quality improvement initiatives.

If interested, please send your CV to the team at roadtocare@umassmed.edu.
