

ABC Message on Coronavirus and Construction in Massachusetts

ABC supports the efforts of Governor Baker and his administration to ensure the safety of all residents of the Commonwealth and all of our valued employees during this unprecedented time. Safety is always critically important in construction, and right now we must undertake extra efforts. As a baseline, ABC recommends that the Massachusetts Construction Site Safety Guidelines issued by the Governor be in place on all projects where work continues. We further urge all members to review other enhanced protocols in line with recommendations of the Centers for Disease Control and Prevention and other public health agencies and implement as appropriate on your jobsites. Paramount among these is the importance of social distancing on any and all active sites.

Among our ABC membership, we have two excellent safety consulting firms, Contractors Risk Management and United Alliance Services Corp. They are both able to assist ABC members to ensure that appropriate safety measures are in place. Erring on the side of caution and taking extra measures to ensure enhanced safety are essential at this time.

Our members take their responsibilities in the construction industry seriously and will continue to put jobsite safety at the highest priority. We respect the directives of the Governor regarding construction activity and are committed to doing our utmost to ensure the safety of our workers and all involved in construction during this unprecedented time. For all work permitted now and additional work that will come back on-line, safety will always come first.
