Types of COVID-19 Tests

COVID-19 RNA Test

- Used to determine if someone is currently infected with COVID-19
- Turnaround time 3-5 days*
from date of collection
(*turnaround time may vary)

COVID-19 Antibody Test

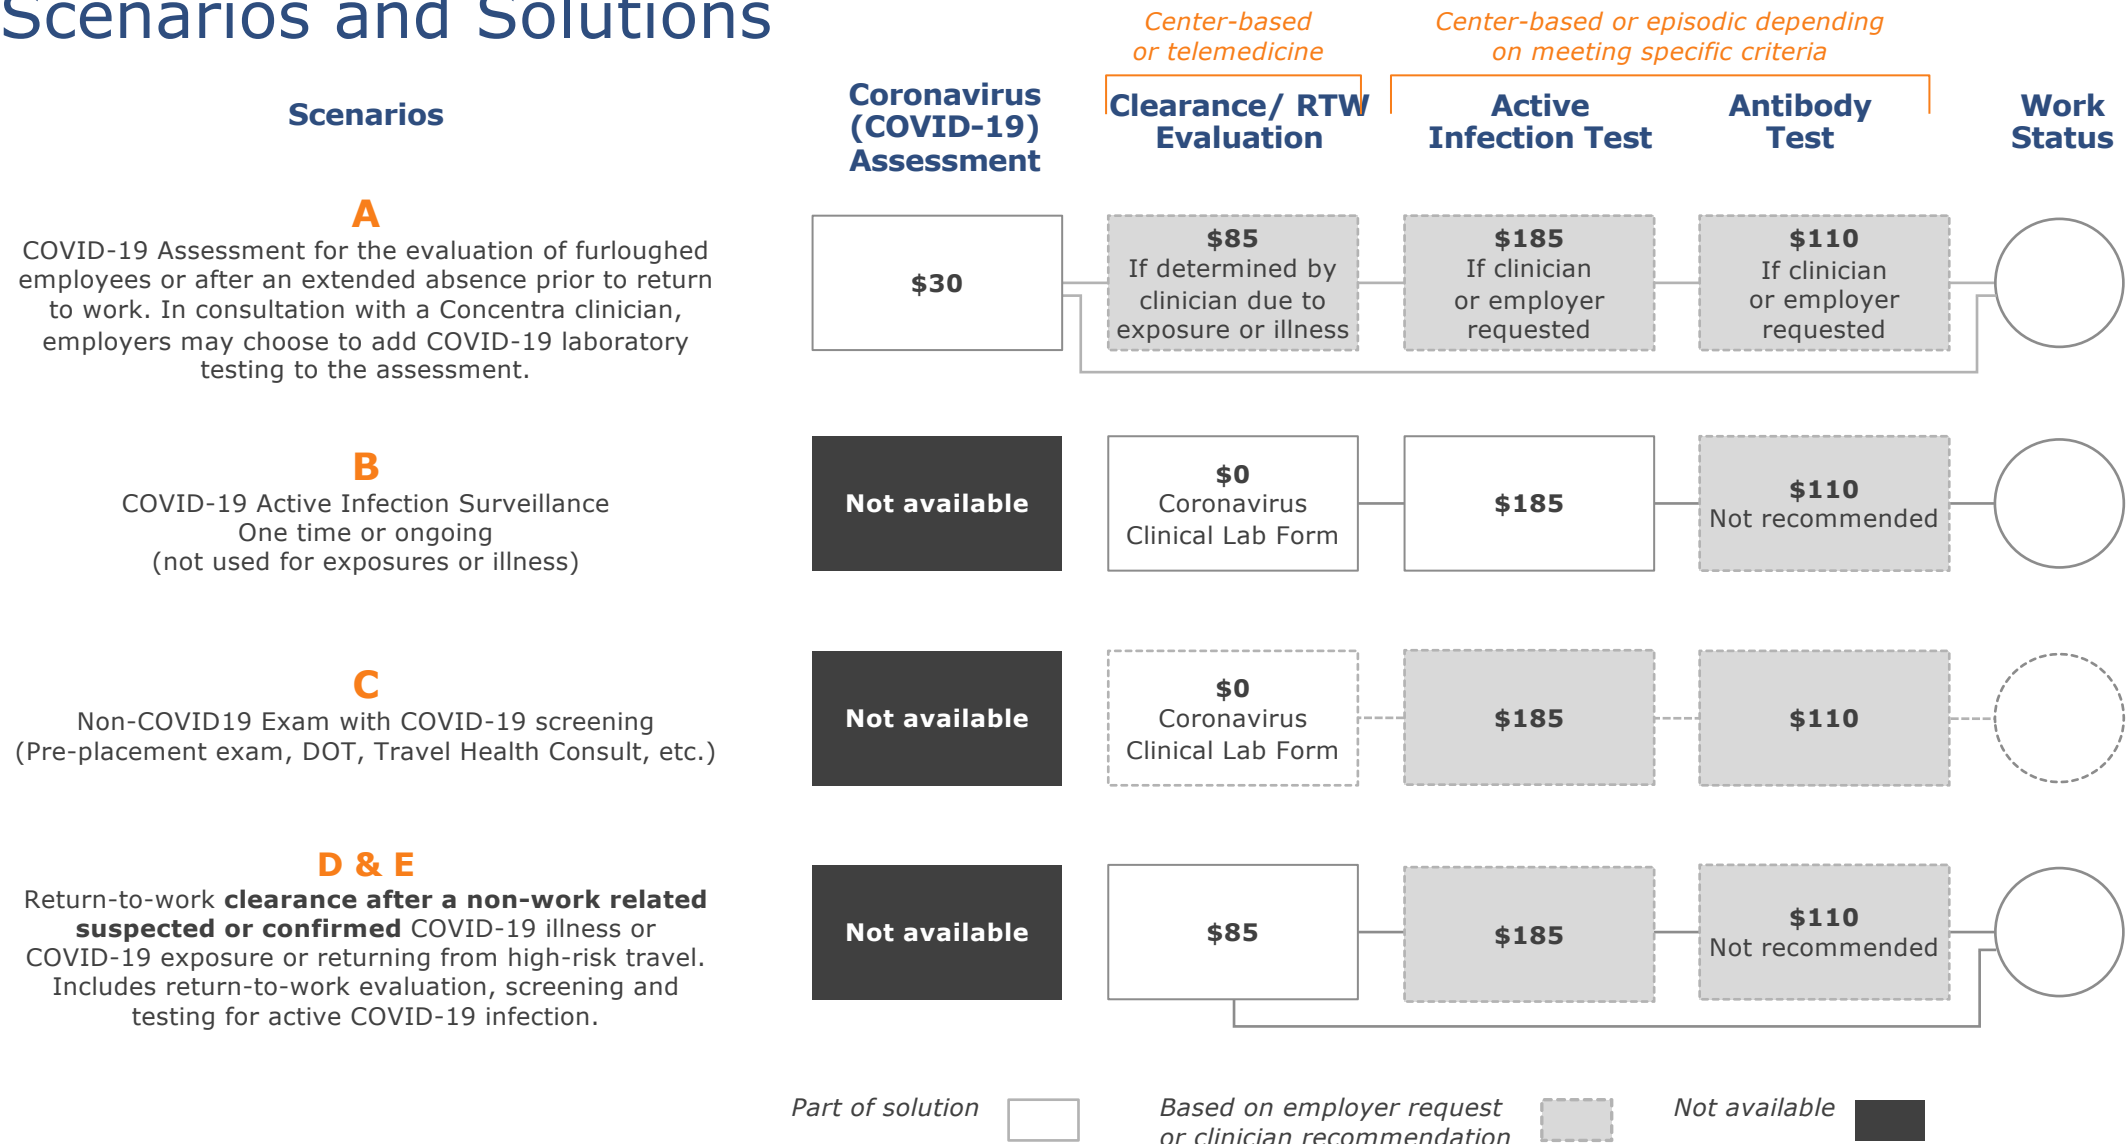

- Blood test to determine if someone has had COVID-19
- Turnaround time 3-4 days
from the date of collection

Medical support staff trained in COVID-19 protocols conduct COVID-19 testing. The support staff wear N95 respirators for the COVID-19 RNA test.

All patients must wear their own face covering or mask when visiting a Concentra center to help protect other patients and our staff from potential exposure to COVID-19. Concentra is unable to supply face coverings at this time.
