REB #: 0415

Are you interested in learning how to meaningfully and authentically engage as a partner in pediatric rehabilitation research? Participate in this online simulation-based video training workshop to support client and family engagement in research.

### **Let's Learn Together How to Support Each Other!**

#### **What is this study about?**

This training workshop uses a series of co-designed, simulation-based videos for research teams and parents and youth to learn how to support each other through complex and challenging situations associated with patient engagement in research.

#### **Who can participate?**

We are looking for individuals interested learning more about engagement in research and are able to attend the workshop training sessions virtually through Zoom:

- Parents/caregivers who have a child (up to age 29) with a childhood onset disability or acquired injury
- Youth (16-29 years) with a childhood onset disability or acquired injury
- Researchers and research staff affiliated with a University or academic hospital in Canada with primary research focus in childhood disability
- Trainees (Masters, PhD, Postdoctoral Fellows) supervised by faculty at a University or academic hospital in Canada with primary research focus in childhood disability

#### **What's involved?**

- Two, two-hour training workshops with 8-10 other stakeholders via Zoom
- Pre/post workshop survey and follow-up focus group
- No previous experience required.

#### **Potential Benefits?**

- This study will help us understand the effectiveness of the Learning Together simulation-based training videos

Participants will receive a small token of appreciation to thank them for their time.
